Subscription Information

Annual Institutional Subscription Rates 1996: North, Central and South America, US $1980, Rest of World, £1245. Associated Personal Subscription Rates are available on request for those whose institutions are library subscribers. Sterling prices exclude VAT. Non-VAT registered customers in the European Community will be charged the appropriate VAT in addition to the price listed. Prices include postage and insurance and are subject to change without notice. Subscription enquiries from customers in North America should be sent to: Elsevier Science Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, USA and from the Rest of the World to: Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, UK Subscription rates for Japan are available on request.

Back Issues: Back issues of all previously published volumes are available direct from Elsevier Science Offices (Oxford and New York). Complete volumes and single issues can be purchased for 1990–1994. Earlier issues are available in high quality photo-duplicated copies as complete volumes only. Back volumes on microfilm are available from UMI, 300 North Zeeb Road, Ann Arbor, MI 48106, USA.

Second-class postage paid at Newark, NJ and additional mailing offices. Postmaster send address corrections to Nonlinear Analysis, Elsevier Science Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, USA.

Volume Contents

Volume 25 Number 1

R. K. Nagle and Z. Sinkala	1	Existence of 2π-periodic solutions for nonlinear systems of first-order ordinary differential equations at resonance
R. Vrábel	17	Semilinear singular perturbation
Geng Di, Yu Qingyu and Qu Changzheng	27	The eigenvalue problem for Hessian operators
G. Bianchi, J. Chabrowski and A. Szulkin	41	On symmetric solutions of an elliptic equation with a nonlinearity involving critical Sobolev exponent
A. Avantaggiati, G. Bruno and R. Iannacci	61	The Hausdorff–Young theorem for almost periodic functions and some applications
Y. Wu	89	Oscillation via limiting equations
G. D. Stefanou and S. E. Moossavi Nejad	103	Dynamic response analysis of flexible structural systems with nonlinear characteristics

Volume 25 Number 2

C. J. Blom and S. A. Vavilov	109	Resonance and near-resonance for a nonlinear wave equation
F. H. Clarke, Yu. S. Ledyaev and R. J. Stern	145	Fixed points and equilibria in nonconvex sets
Kok-Keong Tan, Jian Yu and Xian-Zhi Yuan	163	The stability of coincident points for multivalued mappings
N. Nakauchi and S. Takakuwa	169	A remark on p-harmonic maps
Ming-Po Chen, J. S. Yu, X. Z. Qian and Z. C. Wang	187	On the stability of a delay differential population model
L. Kuntz and S. Scholtes	197	Qualitative aspects of the local approximation of a piecewise differentiable function

Volume 25 Number 3

M. KWAK	217	Fourier spanning dimension of attractors for two-dimensional Navier–Stokes equations
A. WIŚNICKI	223	Hausdorff measure of noncompactness in subspaces of continuous functions of codimension one
Y. LIU	229	Positive solutions to general elliptic systems
B. BIDÉGARAY	247	On a nonlocal Zakharov equation
M. MOLINA-MEYER	279	Existence and uniqueness of coexistence states for some nonlinear elliptic systems
J. M. ALONSO and R. ORTEGA	297	Boundedness and global asymptotic stability of a forced oscillator
T. D. BENAVIDES and HONG-KUN XU	311	A new geometrical coefficient for Banach spaces and its applications in fixed point theory

Volume 25 Number 4

D. GUO and X. LIU	327	Multiple positive solutions of boundary-value problems for impulsive differential equations
L. K. VY and D. D. ANG	339	Frictional contact of an elastic body with a rigid support
S. KAUL	345	On the existence of extremal solutions for impulsive differential equations with variable time
J. E. FURTER and J. LÓPEZ-GÓMEZ	363	On the existence and uniqueness of coexistence states for the Lotka–Volterra competition model with diffusion and spatially dependent coefficients
J. DING and AI HUI ZHOU	399	Piecewise linear Markov approximations of Frobenius–Perron operators associated with multi-dimensional transformations
S. KATO and M. IMAI	409	Remarks on the existence of almost periodic solutions of systems of nonlinear differential equations
M. E. BRADLEY and M. A. HORN	417	Global stabilization of the von Kármán plate with boundary feedback acting via bending moments only

Volume 25 Number 5

T. Zolezzi	437	Well-posedness criteria in optimization with application to the calculus of variations
R. Iannacci and M. N. Nkashama	455	Nonlinear elliptic partial differential equations at resonance: higher eigenvalues
E. Rovderová	473	Third-order boundary-value problem with nonlinear boundary conditions
Yang Shu Lang	487	Quasidifferentiability and positive solutions of equations for set-valued mappings
J. J. Telega	499	Epi-limit on HB and homogenization of heterogeneous plastic plates
Yang Jianfu	531	Global vortex rings and asymptotic behaviour

Volume 25 Number 6

A. Friedman and J. Zhang	547	Swelling of a rubber ball in the presence of a good solvent
G. R. Cirmi	569	Regularity of the solutions to nonlinear elliptic equations with a lower-order term
T. Wang	581	Uniform boundedness with the condition, $V'(t,X_t)\leq -\gamma(t)W_4(m(X_t))-W_5(D(t,X_t))+M$
M. Fečkan	591	A symmetry theorem for dynamical systems
T. Roubíček and K.-H. Hoffmann	607	Theory of convex local compactifications with applications to Lebesgue spaces
A. R. Domingos and M. Ramos	629	Remarks on a class of elliptic problems with asymmetric nonlinearities
M. A. Rammaha	639	Upper bounds for the life span of solutions to systems of nonlinear wave equations in two and three space dimensions

Volume 25 Number 7

A. I. Baumstein and A. L. Skubachevskii	655	On smooth solutions of the boundary-value problems for the systems of differential–difference equations
C. Le Bris	669	On the spin polarized Thomas–Fermi model with the Fermi–Amaldi correction

S. M. LENHART and JIONGMIN YONG 681 Optimal control for degenerate parabolic equations with logistic growth

D. G. COSTA and C. A. MAGALHÃES 699 A variational approach to noncooperative elliptic systems

T. EIROLA, A. M. KRASNOSEL'SKII, M. A. KRASNOSEL'SKII, N. A. KUZNETSOV and O. NEVANLINNA 717 Incomplete corrections in nonlinear problems

S. CARL, S. HEIKKILÄ and V. LAKSHMIKANTHAM 729 Nonlinear elliptic differential inclusions governed by state-dependent subdifferentials

Y. A. KUZNETSOV, S. MURATORI and S. RINALDI 747 Homoclinic bifurcations in slow–fast second order systems

Volume 25 Number 8

H. O. FATTORINI and S. S. SRITHARAN 763 Optimal chattering controls for viscous flow

L. BONAVENTURA 799 Interface dynamics in an interacting spin system

J. HERCZYŃSKI 821 Finite difference approximation of almost periodic Schrödinger operators

P. KOCH MEDINA and G. SCHÄTTI 831 Long-time behaviour for reaction–diffusion equations on $\mathbb{R}^N$

Volume 25 Numbers 9/10

SPECIAL ISSUE: ADVANCES IN DIFFERENTIAL AND INTEGRAL INEQUALITIES

R. P. AGARWAL 871 Preface

S. R. BERNFELD 873 Exchange of stability of an equilibrium of homogeneous planar differential systems

T. A. BURTON, T. FURUMOCHI and QICHANG HUANG 885 Stability in several measures and a differential inequality for a partial integral equation

A. CELLINA 899 On uniqueness almost everywhere for monotonic differential inclusions

S.-N. Chow and M.-L. Pei	905	Aubry–Mather theorem and quasiperiodic orbits for time dependent reversible systems
C. Corduneanu	933	Discrete qualitative inequalities and applications
G. Da Prato	941	Null controllability and strong Feller property of Markov transition semigroups
K. Deimling	951	Nonlinear Volterra integral equations of the first kind
L. Erbe, L. Wen and Z. Xu	959	Lyapunov–Razumikhin functionals and stability theory in terms of two measures for p-NFDE
W. E. Fitzgibbon, M. Langlais, M. E. Parrott and G. F. Webb	975	A diffusive system with age dependency modeling FIV
L. Hatvani	991	On the asymptotic stability for a two-dimensional linear non-autonomous differential system
H. W. Knobloch	1003	Differential inequalities and maximum principles for second order differential equations
V. B. Kolmanovskii	1017	Applications of differential inequalities for stability of some functional differential equations
A. M. Krasnosel'skii, M. A. Krasnosel'skii and J. Mawhin	1029	Differential inequalities in problems of forced nonlinear oscillations
S. Murakami	1037	Stable equilibrium point of some diffusive functional differential equations
F. Neuman	1045	Nonextendable classes of linear differential equations
A. Simon and P. Volkmann	1051	Parabolic inequalities in ordered topological vector spaces
C. A. Swanson	1055	Uniqueness for semilinear polyharmonic problems
G. Vidossich	1063	Differential inequalities for evolution equations
W. Walter	1071	A new approach to minimum and comparison principles for nonlinear ordinary differential operators of second order

Volume 25 Number 11

A. Miranville	1079	Lower bound on the dimension of the attractor for the Bénard problem with free surfaces
Ding Yanheng	1095	Existence and multiplicity results for homoclinic solutions to a class of Hamiltonian systems

S. M. Bouguima	1115	A quasilinear elliptic problem with a discontinuous nonlinearity
E. Braverman and M. Drakhlin	1123	On the variational problem for fiunctionals with deviations of argument
T. Matsuyama	1139	A remark on the nonrelativistic limit for semilinear Dirac equations
F. Linares and M. Scialom	1147	Asymptotic behavior of solutions of a generalized Boussinesq type equation
W. H. Ruan	1159	Convergence to constant states in a population genetic model with diffusion
F. Hüsseinov	1181	Coercivity of integral functionals and existence theorems for extremal problems
E. Liz	1191	Existence and approximation of solutions for impulsive first order problems with nonlinear boundary conditions
T. A. Burton and T. Furumochi	1199	Periodic solutions of a Volterra equation and robustness
H. I. Freedman and A. A. Martynyuk	1221	Stability analysis with respect to two measures for population growth models of Kolmogorov type
T.-C. Lim and Hong-Kun Xu	1231	Uniformly Lipschitzian mappings in metric spaces with uniform normal structure
Q. Kong and Xiaoxin Liao	1237	Dissipation, boundedness and persistence of general ecological systems
M. H. Lee	1251	Tau-functions and automorphic forms

Volume 25 Number 12

M. Contreras	1257	Double resonance for quasilinear elliptic higher order partial differential equations between the first and second eigenvalues
Yang Jianfu	1283	Positive solutions of quasilinear elliptic obstacle problems with critical exponents
Z. Naniewicz	1307	Hemivariational inequalities with functionals which are not locally Lipschitz
A. G. Kartsatos	1321	On the construction of methods of lines for functional evolutions in general Banach spaces
Z. Ding and A. G. Kartsatos	1333	Nonzero solutions of nonlinear equations involving compact perturbations of accretive operators in Banach spaces

LINGHAI ZHANG	1343	Decay of solutions of generalized Benjamin–Bona–Mahony–Burgers equations in n space dimensions
L. YONGOING	1371	A limit index theory and its applications
J. SANTANILLA	1391	Existence and nonexistence of positive radial solutions of an elliptic Dirichlet problem in an exterior domain
B. S. MORDUKHOVICH and Y. SHAO	1401	Differential characterizations of covering, metric regularity, and Lipschitzian properties of multifunctions between Banach spaces
S. C. WELSH	1425	A vector parameter global bifurcation result
	I	Title Page, Volume Contents and Author Index, Volume 25, 1995
